(54) PRINTING CONTROLLER

(57) Abstract:

PROBLEM TO BE SOLVED: To ensure security of printing data transfer, based upon the FTP protocol.

SOLUTION: In a security user list 11, users who are allowed to perform security-printing are registered in advance. A user recognition part 10 stores received data in a security spool 90 on condition that a received user command as an FTP protocol command or information on a path command is registered in the list 11. A manual printing control part 13 reads a stored data out of the security spool 90 and transfers them to a printer engine when a security user name is inputted from a console 5 together with a printing request.

LEGAL STATUS

- [Date of request for examination]
- [Date of sending the examiner's decision of rejection]
- [Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
- [Date of final disposal for application]
- [Patent number]
- [Date of registration]
- [Number of appeal against examiner's decision of rejection]
- [Date of requesting appeal against examiner's decision of rejection]
- [Date of extinction of right]
